CLAIM AMENDMENTS

Please amend the claims as follows:

	16. (newly amended) A universal trailer-hitch mirror system comprising:
	an attachment configuration having a system fastener for fastening the
attach	ment configuration to a support object that is accessible for support of a mirror
holde	er on which a system mirror is positioned for mirror-viewing of tow trailer-hitch
comp	onents of a tow vehicle and for mirror-viewing of trailerable trailer-hitch
comp	onents of a trailerable vehicle from a vehicle mirror;
	the tow vehicle being within hitching-steerable proximity to the trailerable
vehic	le;
	the mirror holder being attached orientationally to the attachment configuration
with a	an orientation controller;
	the system mirror being attached orientationally to the mirror holder selectively
with a	a system-mirror joint;
	the attachment configuration being articulated to be positioned in desired
proxi	mity to rear components of the tow vehicle, to front components of the
traile	rable vehicle and to objects proximate thereto selectively;
	the system fastener being articulated predeterminedly to attach the attachment
config	guration to the support object selectively;
	the orientation controller being articulated to orient the mirror holder
contro	ollably in a desired orientation of attachment to the attachment configuration;
and	
	the system-mirror joint being articulated to orient the system mirror in a
mirro	red line of sight line-of-sight from the vehicle mirror to the tow trailer-hitch
comp	onents and to the trailerable trailer-hitch components selectively,
	wherein the support object is a group of support objects comprising a back

25	window of the tow vehicle, a pickup-truck tailgate on the tow vehicle and a back of
26	the tow vehicle;
27	the attachment configuration includes a window bracket having two bracket
28	attachment rods with controller ends extended in a direction that is outwardly from
29	a rear surface of the tow vehicle;
30	the orientation controller includes two pivot joints with which the mirror holder
31	is attached orientationally and fixedly to the two bracket attachment rods;
32	the system fastener includes a plurality of suction cups on a window- bracket
33	member intermediate the two bracket attachment rods;
34	the suction cups are articulated and situated to suction-fasten the window
3 <i>5</i>	bracket to the back window of the tow-vehicle;
36	bracket cushioning is situated intermediate the window bracket and the rear
37	surface of the tow vehicle;
38	the mirror holder includes a mirror bracket having two mirror attachment rods
39	that are attached to the two bracket attachment rods with the two pivot joints;
40	the system-mirror joint is on a window- bracket member intermediate the two
41	mirror attachment rods; and
42	the vehicle mirror is a rearview mirror having line-of-sight vision through the
43	tow vehicle to the system mirror.
